图形 (安装面符合:ISO7368) Shape (installation surface complies with ISO 7368)

H7: 配合深度 H9: 控制尺寸

$\phi D3_{min} \sim \phi D3_{max}$: B口直径, B口可绕A口中心轴线旋转, 但无论如何不能损坏固定孔和控制口。

H1, min ~ H1 max: 从盖板安装面至该孔中心的距离必须计算, 该值须与 $\phi D3_{min} \sim \phi D3_{max}$ 协调, H1min 对应 $\phi D3_{max}$, H1max 对应 $\phi D3_{min}$ 。

$\phi D1$: 当孔 $\phi D1 \leq 45mm$ 时允许配合公差改为 H8 (即 NG16, NG25)。

注: 1. LSV*A型安全阀右视图中Y, Z1, Z2控制油口无须加工。

2. 安装孔在安装 LSV 型安全阀钱必须均匀涂抹锂基润滑脂。

3. 尺寸 H2 严禁超公差, 此尺寸与位置传感器精度相关。

H7: depth of fit H9: Control dimension

$\phi D3_{min} \sim \phi D3_{max}$: diameter of port B, which can rotate around the central axis of port A, but shall not damage the fixing hole and control port in any case.

H1, min ~ H1 max: the distance from the installation surface of the cover plate to the center of the hole must be calculated, and the value must be coordinated with $\phi D3_{min} \sim \phi D3_{max}$. H1min corresponds to $\phi D3_{max}$, and H1max corresponds to $\phi D3_{min}$.

$\phi D1$: when the hole $\phi D1 \leq 45mm$, the allowable fit tolerance is changed to H8 (i.e. NG16, NG25).

Note: 1. The Y, Z1 and Z2 control oil ports in the right view of LSV * A safety valve do not need to be machined.

2. The installation hole must be evenly coated with lithium grease before installing the LSV safety valve.

3. Dimension H2 must not exceed the tolerance. This dimension is related to the accuracy of the position sensor.

H7:配合深度

$\phi D3_{min} \sim \phi D3_{max}$: 是允许配合公差改为H8(即NG25)。

注:1.LSV*H型安全阀右视图中Z2控制油口无须加工, Z1口可绕A口中心轴线旋转(打孔方式同B口),

2.安装孔在安装LSV型安全阀前必须均匀涂抹锂基润滑脂。

3.尺寸H2严禁超公差,此尺寸与位置传感器精度相同。

H7: depth of fit

$\phi D3_{min} \sim \phi D3_{Max}$: It is allowed to change the fit tolerance to H8 (i.e. NG25).

Note: 1. In the right view of the LSV * H safety valve, the Z2 control oil port does not need to be machined, and the Z1 port can rotate around the central axis of the A port (the drilling method is the same as that of the B port).

2.The installation hole must be evenly coated with lithium grease before installing the LSV safety valve.

3.Dimension H2 must not exceed the tolerance. This dimension has the same accuracy as the position sensor.
